

Standard strip brushes

Our standard strip brush range consists of an aluminium profile (sometimes plastic) and a high-quality polypropylene brush with UV-protection treatment.

Applications

- The applications for Standard strip brushes are limitless
- Simplest applications (air, light or dust sealing, sound insulation...)
- Very complicated and unusual applications (steering, braking, protection)

Available profile types

- H-Profile**
- F-Profile**
- Y-Profile**

The different profiles (H, F or Y) enable the creation of various models; by combining the different fibre dimensions, the possible forms and colours of the profile (untreated and silver anodised), Stribo Pro offers about a hundred different possibilities.

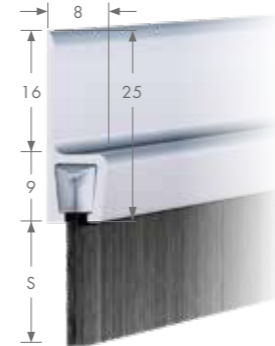

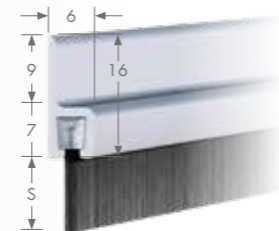

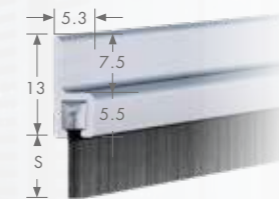

Standard strip brushes are available in lengths of 1 m and 3 m, to be cut to size. Please contact us for special requirements. On request we offer varnishing in the colours of your choice.

H-Profiles Standard product range

Quick and easy assembly | Very short delivery period

H-Profile

(scale 1:1)

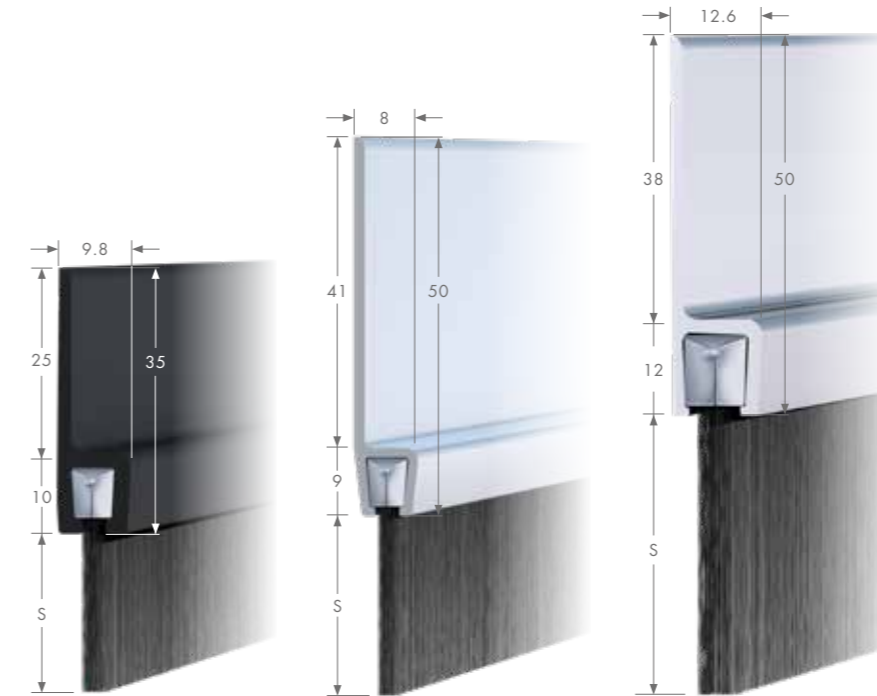

Profile H2	
Fibre length	Model
S = 10	H2-10

Profile H3	
Fibre length	Model
S = 14	H3-14
S = 24	H3-24
S = 34	H3-34

Profile H5	
Fibre length	Model
S = 25	H5-25
S = 35	H5-35
S = 45	H5-45

All dimensions in mm.

Profile PVC [P]	
Fibre length	Model
S = 25	P5-25
S = 35	P5-35
S = 45	P5-45

Profile aluminium [G]	
Fibre length	Model
S = 25	G5-25
S = 35	G5-35
S = 45	G5-45

Profile H8	
Fibre length	Model
S = 40	H8-40
S = 60	H8-60
S = 80	H8-80
S = 120	H8-120
S = 150	H8-150

COLOUR OPTIONS AND FILAMENTS:

Untreated, silver anodised. Filaments are extruded from type PP UV treated.

F-profiles

Standard product range

Quick and easy assembly | Very short delivery period
